NEW!
NOW CONNECT UP TO 5 INDOOR UNITS!

DAIKIN MXS SERIES
MULTI-ZONE HEATING & COOLING SYSTEMS

1.5-4 TON, 2-5 ZONE SYSTEMS
Up to 20.2 SEER / Up to 12.5 HSPF
Up to 12.7 EER
VARIABLE-SPEED COMPRESSOR
RESIDENTIAL AND LIGHT COMMERCIAL APPLICATIONS
Today, the air is perfect. Perfect temperature. Perfect humidity. Perfectly clean and fresh, like just after a rainstorm. And the only thing more perfect than this outdoor scenario is that it’s all happening inside. Because that’s where we work. That’s where we play, where we sleep, where we truly live.

And that’s why at Daikin, we aim to make the air inside as refreshing as the outside. Better comfort. Better control and efficiency. Better quality. So you can create your own unique ecosystem. And everyday is perfect.

Inside and out.

---

**AIR INTELLIGENCE™ built-inside**

A better understanding of how people inhabit their living spaces has led to products designed to create indoor environments that help use energy resources more effectively. Heat pumps extract or reject heat from the outside air, even in cold weather. They use an electrically powered compressor and are extremely effective at heating and cooling an apartment or a house. Daikin heat pumps are quiet and discreet, and use state-of-the-art technology to keep your energy bills low. With a Daikin heat pump, a large portion of the energy used to heat or cool your home comes from the outside air, a free and infinitely renewable resource.
Comfort
We offer a wide range of products, and always provide you with the ideal solution, whether for an apartment, condo or a house. Our units are whisper quiet and, with their specially designed airflow pattern, they create your ideal indoor climate.

Daikin units are designed to include features that let you create your own unique ecosystem. From the wide-angle louver design to the auto-swing and comfortable mode controller settings, effective heating and cooling is ensured throughout the space.

Smart inverter technology
Integrated with an inverter variable-speed compressor, Daikin systems deliver the capacity required to maintain desired room conditions, typically reducing energy consumption by up to 30% or more (compared to traditional fixed-speed ducted systems). This technology minimizes temperature fluctuations and provides continuous cooling and heating comfort.

Energy efficiency
Our products are designed to be highly efficient all year round, and their low energy consumption is reflected in low energy bills for you.

Control**
Our expertise makes life easier for you, allowing you to control your system via a smartphone app or a user-friendly remote control.

Reliability
Daikin products are renowned for their reliability. And you can rely on service to match, with industry leading warranties.*

---

* Complete warranty details available from your local dealer/contractor or at www.daikincomfort.com. To receive the 12-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec.

** Comfort Control app not compatible with FDMQ or VISTA indoor units.
Knowledge is power
In general, system performance is measured by a higher Seasonal Energy Efficiency Ratio (SEER) and Energy Efficiency Ratio (EER). Higher ratings mean lower operating costs. Similarly, a higher rated Heating Seasonal Performance Factor (HSPF) and Coefficient of Performance (COP) means a more efficient air-source heat pump.

Why is it important?
The COP of a heat pump is the ratio of: \( \text{COP} = \frac{\text{energy out}}{\text{energy in}} \)
When the COP is >1, the result is a system providing more heating energy than energy consumed. As the COP increases, the higher the efficiency — resulting in lower utility costs.

Individual comfort and control
Daikin systems come standard with an infrared remote controller allowing you to access all functions at the click of a button.

From anywhere in the world. Or your living room.*+
It can happen to anyone. You forgot to change the temperature of your heat pump system or air conditioner before leaving the house, or you will be delayed returning home and wish to avoid needlessly heating or cooling your home. What in the past would have resulted in wasted energy is no longer a problem. With the new Daikin Comfort Control App, you are always in control. You can use your tablet or smart-phone to access your Daikin system via the internet.

*Comfort Control app not compatible with FDMQ or VISTA indoor units.
+ Requires purchase and installation of adapter (BRP072A43)
MXS Series
Multi-Zone Heating and Cooling Systems

Multi-Zone systems provide high efficiency and comfort

Daikin’s Multi-Zone Systems are ideal for multi-room applications desiring individual room comfort in a space-saving design. With the ability to connect two, three, four, or five indoor units to a single outdoor unit, over 1,000 combinations are possible with the choice of wall mount units, ducted units, ceiling cassette units, floor mounts or a combination. Suitable for both new build and renovation projects, Daikin Multi-Split Systems are the smart, reliable solution for your home.

Premium comfort features:

» Energy Efficient – Up to 20.2 SEER, 12.5 HSPF, up to 12.7 EER – Variable-Speed Inverter Compressor
» Cooling Range 14°F - 115°F
» Heating Range 5°F - 60°F

Ideal solution for:

» Entire homes or floors of homes
» Multiple zones
» New construction
» Primary living areas (master bedrooms and living rooms)
» Basements

Outdoor unit features:

» Anti-Corrosion Treatment on Heat Exchanger
» Quick Warming Function – Prevents the compressor from pumping liquid refrigerant in low-ambient conditions.
» Automatic Defrosting – Sensor performs automatic defrosting of the outdoor heat exchanger if necessary, ensuring optimum heating performance.
» Outdoor Unit Quiet Operation – Outdoor unit sound levels can be reduced by 3dB for times when quieter operation is needed.
» Intelligent Defrost Mode* – The outdoor unit will enable this mode to help prevent frost/ice from building up in cold climate conditions. It will also help with longer heating operation time for additional comfort for occupants (compared to HVAC systems without this function).

*Available on 5MXS only

New drain pan

» Newly designed drain pan on 5MXS outdoor unit to help prevent condensate from freezing and causing damage to the fan and coil.
Why choose Daikin?

Daikin is the world leader when it comes to heating and cooling. Thanks to our constant innovation in comfort, energy efficiency, control and reliability, we define the benchmarks for quality within the industry.

Expert reviews from our most important critics.

Daikin offers a wide selection of choices for energy-efficient indoor comfort. As a worldwide leader in heating and cooling technology, Daikin is also a highly-rated brand. See for yourself at www.daikincomfort.com/reviews.
